Commit 4dfbc3f

CJMORE66 committed 4 minutes ago

Add HMI auto process data popup and DB integration

Introduced new SCL function block 'AutoProcessDataPopUp' and associated data blocks for HMI process data editing and visualization. Integrated the function block call into the main OB1 program. Updated PLC tags and made adjustments to robot flow and step logic, including removal of redundant transitions and step members, and improved data clear/move actions for process data handling.

23 +     // FC_AutoProcessPopup handles
        popup visualization and editing of
        AutoProcess
24 +     // data based on index from HMI.
25 +     // The function provides:
26 +     // - automatic data loading from
        AutoProcessData according to selected
        index,
27 +     // - two-step confirmation for
        safe data overwrite (compare first,
        write second),
28 +     // - automatic reset of edit mode
        when index is changed,
29 +     // - delete functionality for
        selected record,

```

```

30 + // - status bits for HMI to
    visualize pending changes and
    confirmation dialogs,
31 + // - index range control (1..16).
32 + //
33 + // Data flow:
34 + // AutoProcessData ->
    ActualSHowingData (display mode)
35 + // ActualSHowingData ->
    AutoProcessData (after double
    confirmation)
36 + //
37 + // Usage:
38 + // Call cyclically
39 + // RMS index is taken from
    AutoProcess_HMI.IndexProcess.

42 + // CZ:
43 + // FC_AutoProcessPopup obsluhuje
    zobrazení a editaci dat AutoProcess
    podle
44 + // indexu z HMI.
45 + // Funkce zajišťuje:
46 + // - automatické načítání dat z
    AutoProcessData podle zvoleného
    indexu,
47 + // - dvoukrokové potvrzení zápisu
    (nejprve porovnání, poté zápis),
48 + // - automatické zrušení editace
    při změně indexu,
49 + // - mazání záznamu podle indexu,
50 + // - stavové bity pro HMI
    (čekající změna, potvrzovací dialog),
51 + // - kontrolu rozsahu indexu
    (1..16).
52 + //
53 + // Tok dat:
54 + // AutoProcessData ->
    ActualSHowingData (zobrazení)
55 + // ActualSHowingData ->
    AutoProcessData (po potvrzení)
56 + //
57 + // Použití:
58 + // Volat cyklicky
59 + // Index je čten z
    AutoProcess_HMI.IndexProcess.
60 + //
